

APPENDIX 4: Streetscape Selections

The aesthetic and economic value that a standardized streetscape program does for a downtown environment is substantial. Creating a cohesive and unified visual landscape, it invites pedestrian traffic to the area and promotes lingering of patrons; this alone is an economic boost to any downtown economy.

But standardized streetscapes also encourage investment by developers and business-owners; once an area has illustrated the city's commitment in the infrastructure necessary to support their business endeavor, they themselves are likely to do the same.

Downtown Mountain Home has not yet adopted or established any type of streetscape standard; this Appendix contains the selections of essential street furnishings that will be a first step toward developing new standards and ordinances, which will begin to work to facilitate the downtown revitalization.
