

# Mountain Home Downtown Revitalization Plan: Phase 1

The City of Mountain Home is planning for the future by investing in creating a more vibrant, walkable and livable downtown area to attract new residents, businesses and opportunities.

With the helpful input from the community, The City of Mountain Home has made multiple changes to the Master Plan to meet community requests as displayed below.

## Original Proposal

## Final Master Plan

### Parking

Proposed to remove parking completely along N Main Street and N. 2nd East

Includes a few short-term parking spaces for citizens to still be able to access businesses quickly and easily

%

Only 15% of cars parked in the areas marked for removal\*

### Traffic directional changes

Proposed changing E 2nd N. St. and East 4th North St. to one-way street

Keeps side streets as two-way streets

Mountain Home FD, in coordination with the State Fire Marshal, determined there are no safety or operational concerns with the plan

### Bicycle lanes

Proposed to add bicycle lane on North 2nd East St.

After public concern about a bicycle path on North 2nd East St., the bicycle lane was moved to North 3rd East St. to ensure safer travel

The final design reflects the integration of public input, along with the collaborative efforts of a variety of experts and partners, including ITD and URA. The final result improves on both roadway and pedestrian safety, while enhancing the aesthetics and atmosphere of our downtown, for the benefit of our residents and businesses.

## Phase 1 Timeline

95% engineering completed

Project open for bid

2018

2019

Landscape design completed & submit plans to ITD

Estimated construction start in early spring
